## 'DX Block' Premieres Oct. 3 on WWCR

On Saturday, Oct. 3, 1998, WWCR will premier a new "DX Block" of programming. WWCR welcomes Dr. Kim Andrew Elliott to its airwaves as host of the Voice of America's one-half-hour radio program "Communications World." Following Dr. Elliott's program will be "World of Radio" with Glenn Hauser. WWCR is proud to carry these programs as an informational service to the DX community.

"Communications World" began as "World Shortwave Spectrum" on the Voice of America in 1984. Dr. Elliott took over as producer and presenter of "Communications World" in September 1995. "Communications World" is a weekly program about developments in electronic media and international broadcasting. Currently, on the VOA, the program is broken up into three separate segments, broadcast at different times. This "DX Block" on WWCR will allow listeners to hear the entire program at one time. The "Communications World" Web site can be accessed at: <http://www.trsc.com/cw/>.

**WORLD OF RADIO** Glenn Hauser has produced "World of Radio" since 1980 and is happy to have a "locked-in" time for his program. "World of Radio" is an informational program about communications around the world, especially shortwave. It is carried on a sustained basis, moved around to accommodate the needs of WWCR's programming. The "World of Radio" Web site can be accessed at: <http://www.angelfire.com/ok/worldofradio/>.

Exclusive sponsorship of this "DX block" is provided by Grove Enterprises, publishers of "Monitoring Times." Grove Enterprises, Inc., retails advanced radio

monitoring equipment for the avid communications listener. The Grove Enterprises Web site is at: <http://www.grove-ent.com>.

The "DX block" can be heard on WWCR-Shortwave Radio, on 5.070 MHz - Saturday at 5:00 PM-Central (2200 UTC). The shows are repeated on 3.210 MHz - Monday at 12:00 AM-Central (0500 UTC), on a space available basis. For more information, contact Adam or George.

**WWCR reserves the right to change program days and times. Check the Program Guide for current air times.**
